(a) same IPR = 0.656
mode power $|\psi_n|^2$
guide position from centre
T: topological interface
D: detuned defect (Δ matched)
(b) where the two modes sit
D mode, b = 2.22
T mode, b = 0
b/κ_2
eigenvalue index
T spectrum
D spectrum
(c) first-order PREDICTION
predicted std$(\delta b)/\kappa_2$ per unit σ
0.00
0.51
0.81
0.81
0.81
1.23
coupling (per σ_κ)
on-site (per σ_β/κ_2)
width model ($\sigma_\beta = \sigma_\kappa$)
